

A young woman with long, wavy red hair is shown from the chest up, looking down at a dark-colored smartphone held in her hands. She has a pleasant expression, with a slight smile. She is wearing a light-colored, possibly white, textured sweater. The background is a bright, out-of-focus indoor space, likely a home or office with large windows.

MOTION CAPTURE PLUG

Two (2) Motion Capture Plugs (MCP).

Note: Quantity may vary.

Motion Capture Plug

GL-INET MESH ROUTER & ACCESSORIES

One (1) GL-iNet B1300 Mesh Router, one (1) GL-iNet Power Adapter and one (1) Ethernet cable

GL-iNet B1300 Mesh Router

Power Apdapter

Ethernet Cable

NOTE: Install the Mesh Router in the horizontal position, and the MCPs in their upright position, whenever possible to maximize the performance of the devices. The GL-iNet Router is to be an addition to your network, and is not intended to replace the user's current home router setup.

1. Connect the GL-iNet

CONNECT TO YOUR NETWORK

1 Connect one end of the supplied Ethernet cable to the WAN port of the GL-iNet router.

2 Connect the other end of the Ethernet cable to a LAN port of your home router.

POWER UP

Plug the power connector into the power port of the GL-iNet router and the power adapter into an AC outlet.

2. Download the App and Create your Account

DOWNLOAD THE APP

Install Remote Care by scanning the QR code or entering the link below directly in the mobile phone's browser.

Alternatively, search for “Aerial Remote Care” by Aerial Technologies in your local app store and download it.

Android

<https://play.google.com/store/apps/details?id=ai.aerial.rca>

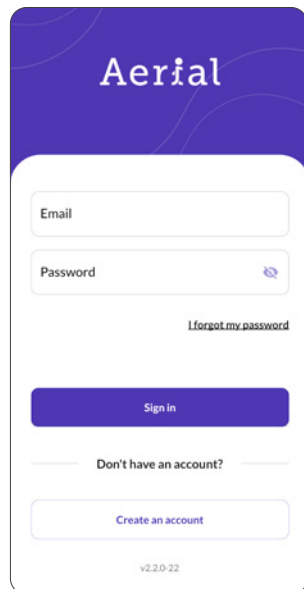

iOS

<https://apps.apple.com/us/app/id1523580936>

CREATE YOUR ACCOUNT

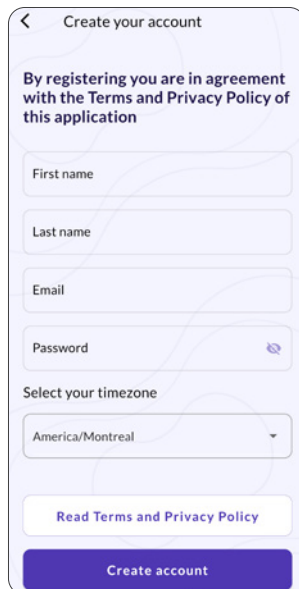

Open the app. On the main screen, select “Create an account”.

The screenshot shows the Aerial app's main screen. At the top is a purple header with the 'Aerial' logo. Below it, there are two input fields for 'Email' and 'Password'. A link 'I forgot my password' is positioned below the password field. A purple 'Sign in' button is located below the input fields. At the bottom, there is a link 'Don't have an account?' and a button 'Create an account'. The version number 'v2.2.0-22' is visible at the very bottom.

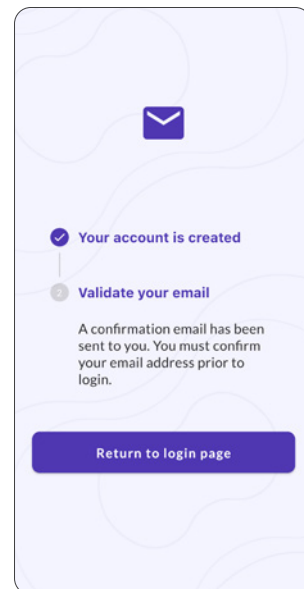

Enter the required information and select “Create account”.

An e-mail will be sent to the e-mail from no-reply@aerial.ai.

The screenshot shows the 'Create your account' screen. It starts with a back arrow and the title 'Create your account'. A disclaimer states: 'By registering you are in agreement with the Terms and Privacy Policy of this application'. Below this are four input fields: 'First name', 'Last name', 'Email', and 'Password'. A 'Select your timezone' section follows, with a dropdown menu currently showing 'America/Montreal'. At the bottom, there is a link 'Read Terms and Privacy Policy' and a purple 'Create account' button.

Click on the “Verify Email” link in the e-mail. Back to the app, click on “Return to login page” to log into the newly created account.

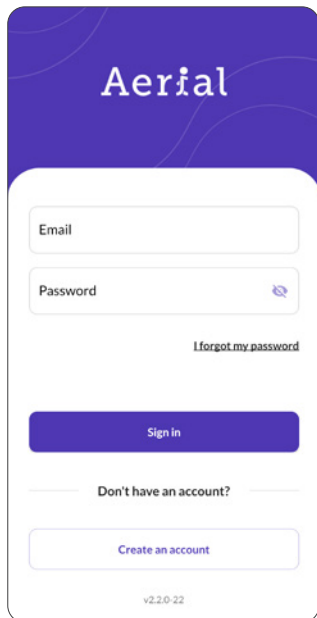

The screenshot shows an email verification screen. At the top is an envelope icon. Below it, a checkmark icon is next to the text 'Your account is created'. A second checkmark icon is next to the text 'Validate your email'. Below this, a message states: 'A confirmation email has been sent to you. You must confirm your email address prior to login.' At the bottom is a purple button labeled 'Return to login page'.

3. Login and Setup

LOG INTO THE APPLICATION

Log into the application using the email and password provided during the account creation process.

A mobile application login screen for 'Aerial'. The screen has a purple header with the app name 'Aerial' in white. Below the header is a white rounded rectangle containing the login form. The form has two input fields: 'Email' and 'Password'. The 'Password' field has a small eye icon to its right. Below the password field is a link that says 'I forgot my password'. Below the link is a purple button with the text 'Sign In'. Below the button is a link that says 'Don't have an account?'. Below the link is a white button with the text 'Create an account'. At the bottom of the white rounded rectangle is the version number 'v2.2.0-22'.

RESIDENCE SETUP

On the following screens the user will be asked to enter information on the elder's name, whether they live alone or not, have pets, type of residence, how many floors the dwelling has, the typical bedtime and wake up times for the elder, and which time zone they are in.

This information will be requested over several screens. Please press the “Next” button to move from one screen to another.

Click the “Complete Residence Set Up” button on the final screen.

RESIDENCE SETUP

4. Install Devices

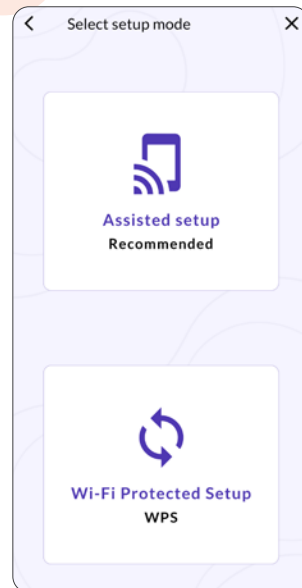

Once in the application, a message will appear asking the user to add the sensing devices.
Select the “Add Device” button.

The guided setup will open. Select the “Start now” button.

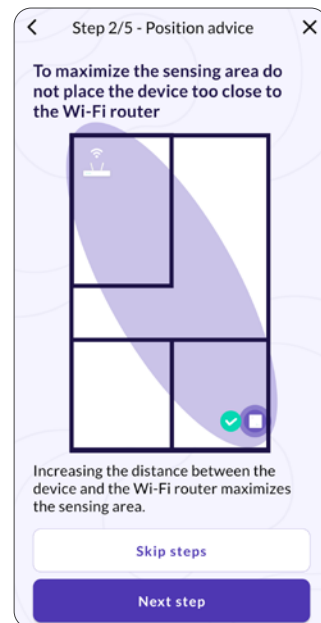

The recommendation is to use the assisted setup as it facilitates the install.

5. Positioning, Pairing and Configuring

POSITIONING THE DEVICES

The positioning of the devices will affect the performance of the services, it is important to place them in strategic locations. The following images will be displayed during the setup. The user can either skip these steps or select next twice to get to Step 3/5. Once ready, select the “Add device” button.

POSITIONING THE DEVICES

While setting up the kit, it is recommended to place the sensing devices near the access point to validate that all is properly configured. Once the setup is complete, the sensing devices can be moved to their desired location. Note that the devices will automatically reconnect to the app after being re-plugged at their new location.

ENTER THE MAC ADDRESS

The next step will be to add the sensing devices. This can be done by scanning the QR code or entering the MAC address manually found on the back of the device. Once done, select "Add Device".

CONFIGURE THE DEVICE

Configure the new Device by giving it a location and a floor. (Note that these options can be changed later). Once completed, select “Confirm”.

Step 5/5 - Device 8002XXXXXXX

Please select the room where you installed the device

RESIDENCE SETUP

When ready, select “Connect now”.

Link account complete

Device added - it is now ready to be connected to your home Wi-Fi network

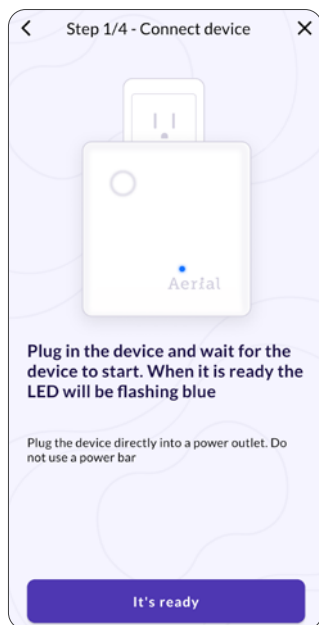

Connect later

Connect now

CONNECT THE DEVICES

Once you have found a suitable location in your home for the device, plug it into the power outlet and wait for the LED to blink blue.

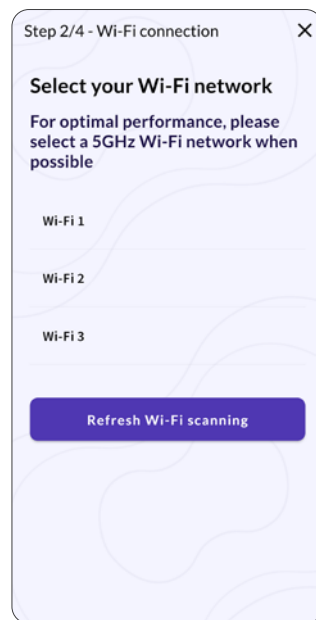

Once the device is ready, select “It’s ready”.

WI-FI CONNECTION

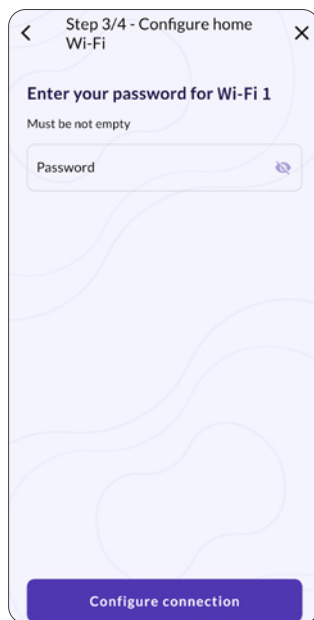

The list of available Wi-Fi networks will be displayed.

Select the one for your home.

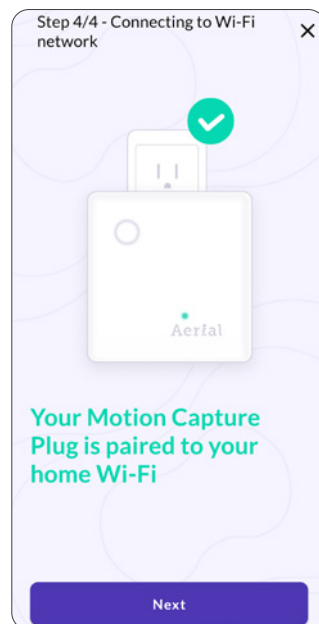

WI-FI CONNECTION

Enter the Wi-Fi password and select “Configure connection”. The default Wi-Fi password will be labeled on the router.

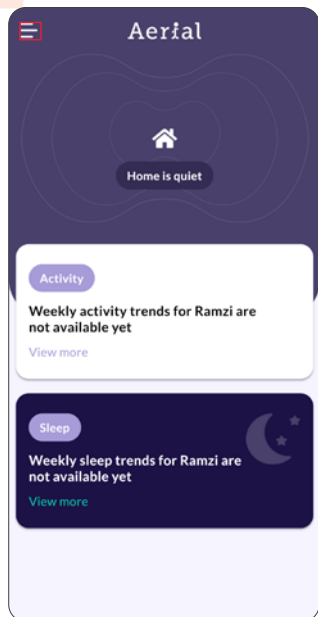

COMPLETE INSTALLATION

On the last step, the confirmation page will open. Select “Next” to go to the main page.

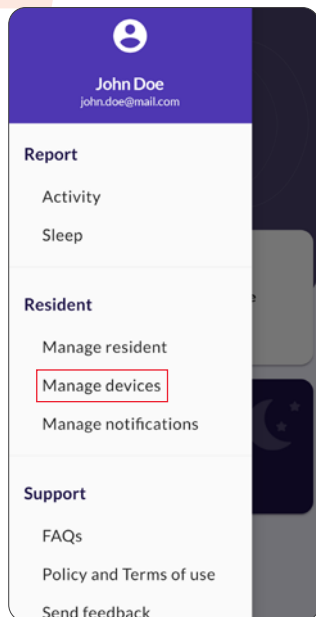

ADDING MORE DEVICES

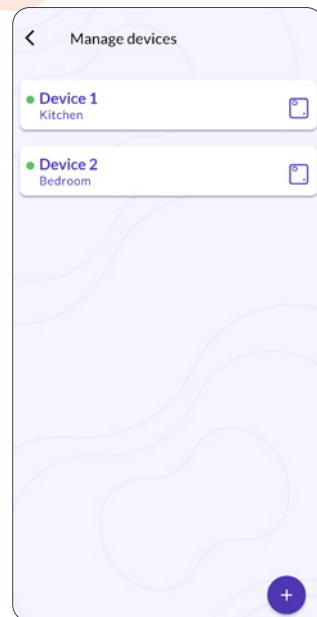

Select the hamburger menu on the top left corner of the app.

Select "Manage Devices".

On the Device management page, click on the + button on the bottom right corner, then select "Add a device". Repeat steps of sections 4 and 5.

6. Validate Setup

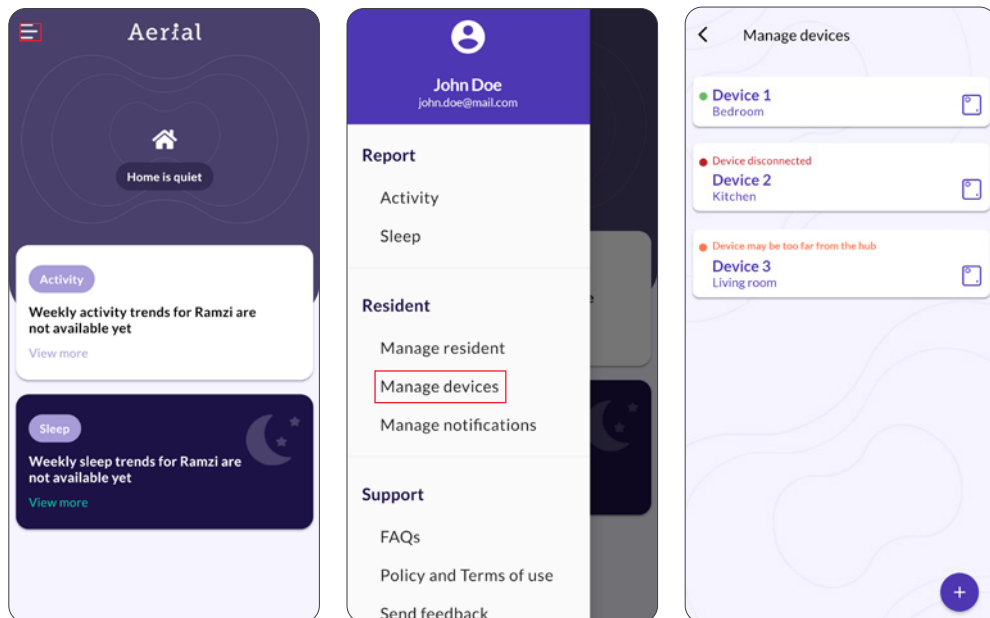

SENSING DEVICE PAIRING

Verify that all sensing devices are properly connected by clicking on the hamburger menu on the top left corner of the application and selecting “Manage devices”.

This screen indicates the status of the sensing devices.

The green network icon represents that the device is connected and working correctly.

The red network icon means that the sensing device is not connected. In this case, please go through the pairing process explained in sections 4 and 5.

ACCESS POINT MODE

1. Position your Access Point and Devices	20
2. Download the App and Create your Account	22
3. Login and Setup	24
4. Install Devices	26
5. Validate Setup	29

1. Position your Access Point and Devices

Before starting, make sure your Access Point (or Router) is connected to the internet and that your sensing devices are connected to the Access Point.

The Peace of Mind sensing network uses your Access Point (AP) or Router and the Wi-Fi devices in your home to create sensing areas between the device and the AP/Router.

The position of these devices relative to your AP/Router is important to ensure that the key areas of your home are monitored (see the following diagrams to better understand what these sensing areas look like and the relative positioning to the Router/AP).

It is important that the Wi-Fi devices selected for Wi-Fi Sensing should not be regularly moved in order to create a reliable sensing network. For example, a smartphone or tablet does not make a good sensing device, however a smart speaker or video streaming device does.

This information can also be found under the FAQ page in the app.

< Positioning help

Let's find the right device position

Distribute devices when the Wi-Fi router is in the center of the home.

< Positioning help

To maximize the sensing area do not place the device too close to the Wi-Fi router

Increasing the distance between the device and the Wi-Fi router maximizes the sensing area.

< Positioning help

Avoid installing the device on the wall adjacent to a corridor or that of a neighbor

Use internal walls when there are adjacent neighbors.

2. Download the App and Create your Account

DOWNLOAD THE APP

Install Remote Care by scanning the QR code or entering the link below directly in the mobile phone's browser.

Alternatively, search for "Aerial Remote Care" by Aerial Technologies in your local app store and download it.

Android

<https://play.google.com/store/apps/details?id=ai.aerial.rca>

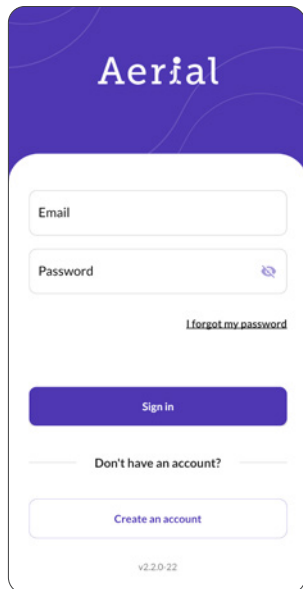

iOS

<https://apps.apple.com/us/app/id1523580936>

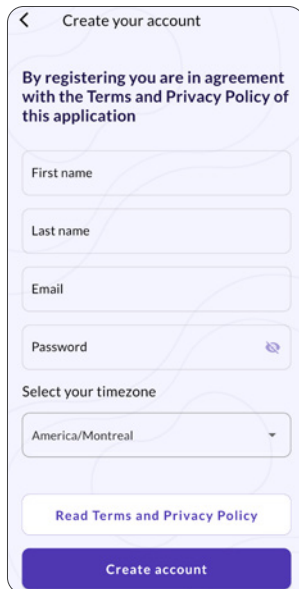

CREATE YOUR ACCOUNT

1 Open the app. On the main screen, select “Create an account”.

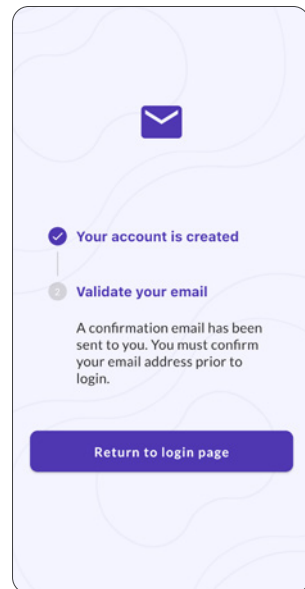

The screenshot shows the main screen of the Aerial app. At the top is a purple header with the word "Aerial" in white. Below the header is a white rounded rectangle containing the login and registration options. It has two input fields for "Email" and "Password" (with an eye icon for toggling visibility). Below the password field is a link that says "I forgot my password". There is a purple "Sign in" button, a link "Don't have an account?" with a right-pointing arrow, and a white "Create an account" button with a purple border. At the very bottom, in small text, it says "v2.2.0-22".

2 Enter the required information and select “Create account”. An e-mail will be sent to the e-mail from no-reply@aerial.ai.

The screenshot shows the "Create your account" screen. It has a back arrow at the top left. The title is "Create your account". Below the title is a bold statement: "By registering you are in agreement with the Terms and Privacy Policy of this application". There are four input fields: "First name", "Last name", "Email", and "Password" (with an eye icon). Below these is a section "Select your timezone" with a dropdown menu currently showing "America/Montreal". At the bottom are two buttons: a white "Read Terms and Privacy Policy" button and a purple "Create account" button.

3 Click on the “Verify Email” link in the e-mail. Back to the app, click on “Return to login page” to log into the newly created account.

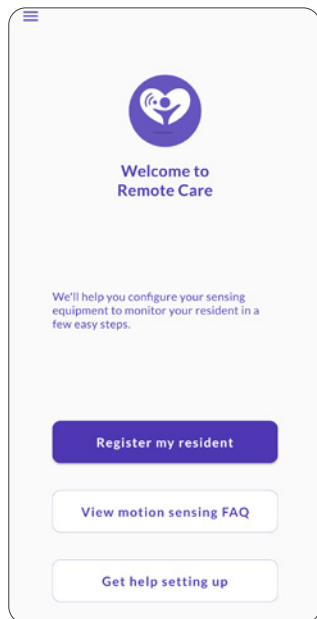

The screenshot shows a confirmation screen with a light purple background and wavy patterns. At the top is a purple envelope icon. Below it is a checkmark icon followed by the text "Your account is created". Underneath is a "2" in a circle followed by "Validate your email". A paragraph of text states: "A confirmation email has been sent to you. You must confirm your email address prior to login." At the bottom is a purple button that says "Return to login page".

3. Login and Setup

LOG INTO THE APPLICATION

Log into the application using the email and password provided during the account creation process. The Welcome page will open. Select “Register my resident”

RESIDENCE SETUP

On the following screens the user will be asked to enter information on the elder's name, whether they live alone or not, have pets, type of residence, how many floors the dwelling has, the typical bedtime and wake up times for the elder, and which time zone they are in.

This information will be requested over several screens. Please press the “Next” button to move from one screen to another.

Click the “Complete Residence Set Up” button on the final screen.
